Geog your memory...

Name two ways that we can classify the world according to different levels of development	Draw a line to match the development indicator and definition
1.	
2.	

Draw a line to match the development indicator and definition

Key Term	Definition
Birth Rate	Average number of deaths of infants under the age of 1, per 1000 live births, per year
Life Expectancy	The number of births in a year per 1000 of the total pop.
Infant Mortality	The average number of years a person is expected to live to

What is the Human Development Index (HDI)?

Explain what each indicator can tell us about quality of life in a country.

Give three disadvantages of development indicators. Why can this be an issue?

1.

2.

3.

Draw the Demographic Transition Model here:

Birth and Deaths per 1000	Stage 1	Stage 2	Stage 3	Stage 4	Stage 5

Why is there a
development
gap?

Explain one way that we can reduce this gap...

Annotate the diagram below to show the key features of a population pyramid
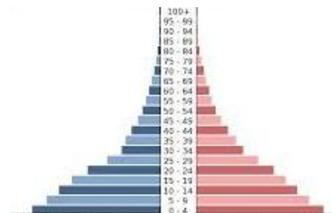

Use two different colours to show whether the statements relate to a HIC or LIC

-1 in 100 deaths is amongst children under 15

-Infectious diseases are the main cause of death e.g. lung infections, HIV/Aids, malaria

-4 in 10 deaths is amongst children under 15

-Main causes of death include chronic diseases such as heart and lung diseases, cancer, diabetes or dementia.

-7 in 10 deaths are amongst people over 70 and over

-Complications in child birth are one of the main causes of death amongst children under 5 years old

Define these key terms:

Migration-

Immigrant-

Emigrant-

Economic migrant-

Refugee-

Displaced person-

Example: How the growth of tourism in an LIC helps to reduce the development gap
Location of Jamaica:

Advantages of tourism for Jamaica (social/econ.env.)	Disadvantages of tourism for Jamaica (social/econ.env.)
