GCSE COMBINED SCIENCE: TRILOGY

F

Foundation Tier
Chemistry Paper 2F

Tuesday 11 June 2024

Morning

Time allowed: 1 hour 15 minutes

Materials

For this paper you must have:

- a ruler
- a scientific calculator
- the periodic table (enclosed).

Instructions

- Use black ink or black ball-point pen.
- Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions in the spaces provided.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.
- In all calculations, show clearly how you work out your answer.

Information

- The maximum mark for this paper is 70.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

0 1

The Earth's atmosphere has changed during the last 4.6 billion years.

0 1 . 1

What is the approximate percentage of nitrogen and of oxygen in the Earth's atmosphere today?

Draw **one** line from each gas to the percentage of that gas.

[2 marks]

Gas	Percentage (%) of gas
	20
Nitrogen	40
Oxygen	60
	80

0 1 . 2

The approximate percentage of carbon dioxide in the Earth's early atmosphere was 95%.

Which are **two** reasons why the percentage of carbon dioxide has **decreased** since the Earth's early atmosphere?

[2 marks]

Tick (✓) **two** boxes.

Combustion of fuels	☐
Deforestation	☐
Dissolving in oceans	☐
Photosynthesis	☐
Respiration	☐

0 1 . 3

Figure 1 shows the change in the percentage of carbon dioxide in the Earth's atmosphere from 1800 to 2020.

Figure 1

Describe the trend in the percentage of carbon dioxide in the Earth's atmosphere from 1800 to 2020.

Use data from **Figure 1**.

[3 marks]

Turn over ►

Carbon dioxide is a greenhouse gas.

0 1 . 4 Which of the following is also a greenhouse gas?

[1 mark]

Tick (✓) **one** box.

Argon

☐

Methane

☐

Nitrogen

☐

Oxygen

☐

0 1 . 5 Which of the following is an environmental problem caused by greenhouse gases?

[1 mark]

Tick (✓) **one** box.

Acid rain

☐

Climate change

☐

Global dimming

☐

0 1 . 6 Calculate the relative formula mass (M_r) of carbon dioxide (CO_2).

Relative atomic masses (A_r): C = 12 O = 16

[2 marks]

Relative formula mass of carbon dioxide = _____

11

ANSWER IN THE SPACES PROVIDED**

0 2

Different tests can be used to identify chemicals.

0 2 . 1

A student measured the melting points of four substances.

Table 1 shows the results.

Table 1

Substance	Melting point in °C
A	52 to 54
B	61
C	−2 to 0
D	80 to 82

Which substance was pure?

Give **one** reason for your answer.

[2 marks]

Substance _____

Reason _____

Question 2 continues on the next page

Turn over ►

Anhydrous copper sulfate can be used to test for water.

The word equation for the reaction is:

0 2 . 2 Complete the sentence.

Choose answers from the box.

[2 marks]

blue	green	red	white	yellow
-------------	--------------	------------	--------------	---------------

When water is added to anhydrous copper sulfate, the colour changes

from _____ to _____.

0 2 . 3 The reaction between anhydrous copper sulfate and water is reversible.

How does the word equation show that the reaction is reversible?

[1 mark]

0 2 . 4

The formula of anhydrous copper sulfate is CuSO_4 What is the total number of atoms in the formula CuSO_4 ?

[1 mark]

Tick (✓) **one** box.

3

☐

4

☐

6

☐

7

☐

0 2 . 5

Chlorine is a gas.

Describe the test for chlorine.

Give the result.

[2 marks]

Test _____

Result _____

Turn over ►

0 3

Printer ink is a mixture of chemicals.

0 3 . 1

What is the name given to a mixture that has been designed as a useful product?

[1 mark]Tick (✓) **one** box.

Formula

☐

Formulation

☐

Fraction

☐

A student used chromatography to investigate the colours in a printer ink.

Figure 2 shows the chromatogram.**Figure 2**

0 3 . 2 The student used a ruler for the start line.

What would the student have used to draw the start line?

Give **one** reason for your answer.

[2 marks]

Reason _____

0 3 . 3 Determine the R_f value of the **red** colour.

Use the equation:

$$R_f = \frac{\text{distance moved by colour}}{\text{distance moved by solvent}}$$

[4 marks]

Distance moved by red colour _____

Distance moved by solvent _____

$R_f =$ _____

Question 3 continues on the next page

Turn over ►

0 3 . 4 Table 2 shows the R_f values of four blue colours.

Table 2

Blue colour	R_f
Cerulean	0.40
Cobalt	0.15
Prussian	0.88
Ultramarine	0.68

The student determined that the R_f value of the blue colour in the printer ink was 0.86

Suggest which blue colour was used in the printer ink.

Give **one** reason for your answer.

[2 marks]

Blue colour _____

Reason _____

0 4

Tap water must be safe to drink.

0 4 . 1

What name is given to water that is safe to drink?

[1 mark]Tick (✓) **one** box.

Ground water

☐

Potable water

☐

Waste water

☐**0 4 . 2**

Water is sterilised to make the water safe to drink.

Which **two** of the following are used to sterilise drinking water?**[2 marks]**Tick (✓) **two** boxes.

Carbon dioxide

☐

Electrolysis

☐

Filtration

☐

Ozone

☐

Ultraviolet light

☐**Question 4 continues on the next page****Turn over ►**

A student investigated the mass of dissolved solids in samples of river water, sea water and tap water.

This is the method used.

1. Weigh an evaporating basin.
2. Measure 100 cm³ of river water.
3. Pour the river water into the evaporating basin.
4. Heat the evaporating basin until all the water has evaporated.
5. Weigh the evaporating basin and dissolved solids.
6. Calculate the mass of dissolved solids in the water.
7. Repeat steps 1 to 6 with sea water and then with tap water.

0 4 . 3 Which is the most suitable equipment to measure 100 cm³ of water?

[1 mark]

Tick (✓) **one** box.

Beaker

☐

Conical flask

☐

Measuring cylinder

☐

0 4 . 4 Table 3 shows the results.

Table 3

Type of water	Mass in grams		
	Evaporating basin	Evaporating basin and dissolved solids	Dissolved solids
River	112.1	113.1	1.0
Sea	110.5	114.0	X
Tap	115.3	115.4	0.1

Calculate value **X** in **Table 3**.

[1 mark]

X = _____ g

0 4 . 5 Identify the variables used in the investigation.

Draw **one** line from each variable to the example of the variable.

[2 marks]

Table 4 shows the mass of different types of ions dissolved in 1 dm³ of sea water.

Table 4

Type of ion	Mass of type of ion dissolved in 1 dm ³ of sea water in grams
Calcium	0.4
Magnesium	1.3
Sulfate	2.7

0 4 . 6

Complete **Figure 3**.

You should:

- complete the scale for the y-axis
- plot the data from **Table 4** as a bar chart.

[3 marks]**Figure 3**

10

Turn over for the next question**Turn over ►**

0 5

Life cycle assessments (LCAs) are used to assess the environmental impact of different products.

0 5 . 1

212 million kilograms of aluminium is used for packaging in the UK each year.

68.0% of aluminium packaging is recycled.

Calculate the mass of aluminium packaging that is recycled in the UK each year.

[2 marks]

Mass of aluminium recycled = _____ million kg

0 5 . 2 Drinks cans are made from aluminium.

An aluminium can has a mass of 15.8 g.

1000 g = 1 kg

Calculate the **whole number** of aluminium cans that can be made from 4.00 kg of aluminium.

[4 marks]

Whole number of cans = _____

Question 5 continues on the next page

Turn over ►

05.3

Table 5 shows three methods used to dispose of wood and steel after use.

Table 5

	Percentage (%) of material disposed of by each method		
	As waste	Recycled	Burnt
Wood	58	36	6
Steel	15	85	0

Evaluate the sustainability of the disposal of wood and steel.

[4 marks]

0	6
---	---

Alkanes and alkenes are hydrocarbons.

0	6	.	1
---	---	---	---

Define the term 'hydrocarbon'.

[1 mark]

0	6	.	2
---	---	---	---

The general formula for alkanes is C_nH_{2n+2}

Determine the formula of the alkane with 10 carbon atoms.

[1 mark]

Formula = _____

Question 6 continues on the next page

Turn over ►

0 6 . 3 Crude oil is a mixture of hydrocarbons.

Figure 4 represents industrial equipment used to separate crude oil into fractions.

Figure 4

Explain how crude oil is separated into fractions.

Use **Figure 4**.

[4 marks]

0 6 . 4

The alkane molecule $\text{C}_{14}\text{H}_{30}$ can be cracked to produce smaller molecules.

Balance the equation for the reaction.

[1 mark]

Question 6 continues on the next page

Turn over ►

Propene (C₃H₆) is an alkene.

0 6 . 5 Describe the test for alkenes.

Give the result.

[2 marks]

Test _____

Result _____

0 6 . 6 Poly(propene) is made from propene.

Figure 5 represents the repeating unit of poly(propene).

Figure 5

What type of substance is poly(propene)?

[1 mark]

10

0	7	.	1
---	---	---	---

Figure 6 shows the apparatus.

The diagram illustrates a laboratory setup for measuring the volume of carbon dioxide gas produced. On the left, a conical flask is partially filled with a liquid labeled 'Hydrochloric acid' and contains a solid substance labeled 'Calcium carbonate' at the bottom. Bubbles are shown rising from the solid into the liquid. The flask is sealed with a 'Stopper'. A 'Delivery tube' is inserted through the stopper, extending into the flask and then curving downwards to lead into a 'Measuring cylinder'. The measuring cylinder is inverted and submerged in a tank of 'Water'. The delivery tube's end is positioned just below the water surface inside the cylinder. Gas, labeled 'Carbon dioxide', is shown as bubbles entering the cylinder from the tube, displacing the water. The measuring cylinder has a scale with horizontal markings. Labels with leader lines identify the delivery tube, stopper, conical flask, hydrochloric acid, calcium carbonate, carbon dioxide, measuring cylinder, and water.

[6 marks]

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

07.2

The student investigated the effect of increasing the temperature on the rate of a reaction.

Explain the effect of increasing the temperature on the rate of a reaction.

Refer to particles and collisions in your answer.

[3 marks]

Catalysts affect the rate of reactions.

0 7 . 3

What is meant by a 'catalyst'?

[2 marks]

0 7 . 4

What are catalysts in biological systems called?

[1 mark]
