

# Knowledge Map: Colour

## COLOUR WHEEL

2 Primary colours mixed together make secondary colours.

- Yellow + Red = Orange
- Yellow + Blue = Green
- Blue + Red = Purple

Secondary mixed with a Primary colour will make a tertiary colour.

Yellow + Orange = Yellow/Orange  
 Yellow + Green = Yellow/Green  
 Red + Purple = Red/Purple  
 Red + Orange = Red/Orange  
 Blue + Green = Blue/Green  
 Blue + Purple = Blue/Purple

If you add more of one colour that is the dominant colour in the mix.

## Complementary/Contrasting colours

Complementary Colours are colours opposite to each other on the colour wheel?

Placed together in an image they make each other look brighter and more vibrant.

## Harmonious Colours

Harmonious Colours look similar too each other and sit closely to each other on the colour wheel.

## Colour Wheel Facts:

- Combinations of primary colours mixed together will make all other colours on the colour wheel.
- Primary colours cannot be made as they are the source of all other colours.
- All 3 primary colours mixed together will make brown.
- Contrasting colours mixed together will make brown.
