

This is an increase in the amount of people living in urban areas such as towns or cities. In 2007, the UN announced that for the first time, more than 50 % of the world's population live in urban areas.

### Where is Urbanisation happening?

Urbanisation is happening all over the world but in LICs and NEEs rates are much faster than HICs. This is mostly because of the rapid economic growth they are experiencing.

### Causes of Urbanisation

1 - Rural - urban migration

#### Push factors

- Natural disasters
- War and Conflict
- Mechanisation
- Drought
- Lack of employment

#### Pull factors

- More Jobs
- Better education & healthcare
- Increased quality of life.
- Following family members.

2 - Natural Increase

When the birth rate exceeds the death rate.

increase in birth rate (BR)

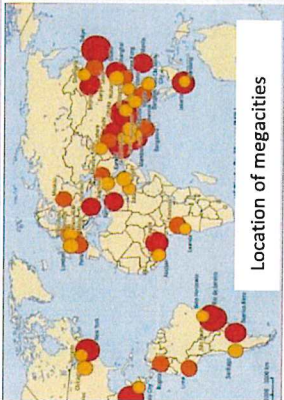

- High percentage of population are child-bearing age which leads to high fertility rate.
- Lack of contraception or education about family planning.

Lower death rate (DR)

- Higher life expectancy due to better living conditions and diet.
- Improved medical facilities helps lower infant mortality rate.

### Types of Cities

legacity An urban area with over 10 million people living there.

More than two thirds of current megacities are located in either NEEs (Brazil) and LICs (Nigeria). The amount of megacities are predicted to increase from 28 to 41 by 2030.

Location of megacities

Sustainable urban living means being able to live in cities in ways that do not pollute the environment and using resources in ways that ensure future generations also can use them.

#### Water Conservation

This is about reducing the amount of water used.

- Collecting rainwater for gardens and flushing toilets.
- Installing water meters and toilets that flush less water.
- Educating people on using less water.

#### Energy Conservation

Using less fossil fuels can reduce the rate of climate change.

- Promoting renewable energy sources.
- Making homes more energy efficient.
- Encouraging people to use energy.

#### Creating Green Space

Creating green spaces in urban areas can improve places for people who want to live there.

- Provide natural cooler areas for people to relax in.
- Encourages people to exercise.
- Reduces the risk of flooding from surface runoff.

#### Waste Recycling

More recycling means fewer resources are used. Less waste reduces the amount that eventually goes to landfill.

- Collection of household waste.
- More local recycling facilities.
- Greater awareness of the benefits in recycling.

### Sustainable Urban Living Example: Freiburg

#### Background & Location

Freiburg is in west Germany. The city has a population of about 220,000. In 1970 it set the goal of focusing on social, economic and environmental sustainability.

#### Sustainable Strategies

- The city's waste water allows for rainwater to be retained.
- The use of sustainable energy such as solar and wind 40% of the city is forested

### Integrated Transport System

This is the linking of different forms of public and private transport within a city and the surrounding area.

### Brownfield Site

Brownfield sites is an area of land or premises that has been previously used, but has subsequently become vacant, derelict or contaminated.

Urban areas are busy places with many people travelling by different modes of transport. This has caused urban areas to experience different traffic congestion that can lead to various problems.

#### Environmental problems

- Traffic increases air pollution which releases greenhouse gases that is leading to climate change.

#### Economic problems

- Congestion can make people late for work and business deliveries take longer. This can cause companies to lose money.

#### Social Problems

- There is a greater risk of accidents and congestion is a cause of frustration. Traffic can also lead to health issues for pedestrians.

### Congestion Solutions

- Widen roads to allow more traffic to flow easily.
- Build ring roads and bypasses to keep through traffic out of city centres.
- Introduce park and ride schemes to reduce car use.
- Encourage car-sharing schemes in work places.
- Have public transport, cycle lanes & cycle hire schemes.

Having congestion charges discourages drivers from entering the busy city centres.

### Traffic Management Example: Bristol

In 2012 Bristol was the most congested city in the UK. Now the city aims to develop it's integrated transport system to encourage more people to use the public transport. The city has also invested in cycle routes and hiring schemes.

## Urban Issues & Challenges

### Greenbelt Area

This is a zone of land surrounding a city where new building is strictly controlled to try to prevent cities growing too much and too fast.

### Urban Regeneration

The investment in the revival of old, urban areas by either improving what is there or clearing it away and rebuilding.

<p><b>Location and Background</b></p> <p>Bristol is a city in the South West of England. The population of the city is 440 500 and is expected to increase to half a million by 2029.</p> 	<p><b>City's Importance</b></p> <ul style="list-style-type: none"> <li>The city enjoys a large sporting heritage with famous athletes and football clubs as well as other culture and entertainment.</li> <li>Bristol has two major UK universities popular with young students.</li> <li>Tourism – UK's 8<sup>th</sup> most popular tourist destination.</li> <li>High level investment – BMW/Airbus</li> <li>M4. Easy access to London and Europe.</li> </ul>	<p><b>Location and Background</b></p> <p>Rio is a coastal city situated in the South East region of Brazil within the continent of South America. It is the second most populated city in the country (6.5 million) after Sao Paulo.</p> 	<p><b>City's Importance</b></p> <ul style="list-style-type: none"> <li>Has the second largest GDP in Brazil. It is headquarters to many of Brazil's main companies, particularly with Oil and Gas.</li> <li>Sugar Loaf mountain is one of the seven wonders of the world.</li> <li>One of the most visited places in the Southern Hemisphere.</li> <li>Hosted the 2014 World Cup and 2016 Summer Olympics.</li> </ul>
<p><b>Migration to Bristol</b></p> <p>During the industrial revolution, the population dramatically increased with people migrating from nearby rural communities.</p> <p>Large numbers from EU countries, in particular Poland and Spain due to retail, transport, construction and manufacturing.</p> <p>Migrants have had a huge impact on Bristol including: contributing to local and national economy, enriching the city's cultural life, improving skill level where there were shortages.</p>	<p><b>City's Opportunities</b></p> <p><b>Social:</b> Bristol has various cultural attractions such as the Colston Hall &amp; museums. Also Cabot Circus is very popular with shoppers.</p> <p><b>Economic:</b> High tech industries have developed in Bristol. Broadband, university research and an educated workforce has helped this.</p> <p>Aardman animations is an example.</p> <p><b>Environmental:</b> Bristol was European Green Capital in 2015. An ITS (Integrated Transport System) was put in place in 2012. There have been transport improvements, improved energy efficiency and the development of renewable energy.</p>	<p><b>Migration to Rio De Janeiro</b></p> <p>The city began when Portuguese settlers with slaves arrived in 1502. Since then, Rio has become home to various ethnic groups.</p> <p>However, more recently, millions of people have migrated from rural areas that have suffered from drought, lack of services and unemployment to Rio. People do this to search for a better quality of life.</p> <p>This expanding population has resulted in the rapid urbanisation of Rio de Janeiro.</p>	<p><b>City's Opportunities</b></p> <p><b>Social:</b> Standards of living are gradually improving. The Rio Carnival is an important cultural event for traditional dancing and music.</p> <p><b>Economic:</b> Rio has one of the highest incomes per person in the country. The city has various types of employment including oil, retail and manufacturing.</p> <p><b>Environmental:</b> The hosting of the major sporting events encouraged more investment in sewage works and public transport systems.</p> <p><b>Self-help schemes – Rocinha, Bairro Project</b></p> <ul style="list-style-type: none"> <li>The authorities have provided basic materials to improve peoples homes with safe electricity and sewage pipes.</li> <li>Government has demolished houses and created new estates.</li> <li>Community policing has been established, along with a tougher stance on gangs with military backed police.</li> <li>Greater investment in new road and rail network to reduce pollution and increase connections between rich and poor areas.</li> </ul>
<p><b>City Challenges</b></p> <p><b>Social:</b> High levels of social deprivation. Filwood = a third of people in the area and over half the children were in very low income families. Top 10% most deprived area in UK.</p> <p><b>Economic:</b> Lack of investment has led to social inequalities in the city.</p> <p><b>Environmental:</b> Urban sprawl has led to increased pressure and decline of greenfield sites around the city. Industrial buildings have become derelict.</p>	<p><b>Bristol City Centre Regeneration Projects</b></p> <p>Temple Quarter was very run down and it gave a bad impression to visitors as it was the first part of the city that they saw.</p> <p>Main features: Bristol's Temple Quarter covers 70 ha and is one of the largest urban regeneration projects in the UK. The 3 main aspects were:</p> <ul style="list-style-type: none"> <li>Enterprise zone status: Encourages growth and creates jobs.</li> <li>New bridge across the Avon to connect the city.</li> <li>Improved access from in and around Bristol.</li> </ul>	<p><b>City Challenges</b></p> <p><b>Social:</b> There is a severe shortage of housing, schools and healthcare centres available. Large scale social inequality, is creating tensions between the rich and poor.</p> <p><b>Economic:</b> The rise of informal jobs with low pay and no tax contributions. There is high employment in shanty towns called Favelas</p> <p><b>Environmental:</b> Shanty towns called Favelas are established around the city, typically on unfavourable land, such as hills.</p>
