

# INEQUALITIES

<b>Keywords:</b>	Inequality, region, solve, equation, variable, linear, quadratic				
<b>Definition / Description:</b>	An inequality is a statement showing two quantities that are not equal. They can be represented on a number line and on a graph.				
<b>Knowledge points:</b>	<b>Inequality notation</b> Know correct conventions of open circle for strict inequality and closed circle for inclusive inequality	<b>Represent Inequalities on a number line</b> Show inequalities on a number line using correct notation	<b>Solving linear inequalities</b> Solve inequalities in one and represent solution set on a number line and using set notation.	<b>Graphical Inequalities</b> Represent inequalities on a coordinate grid	<b>Solve Quadratic Inequalities</b> Solve quadratics and represent answers on a number line and on a graph
<b>Knowledge point examples:</b>	$x > 1$ x is greater than 1  $x < 5$ x is less than 5  $x \geq 2$ x is greater or equal to 2  $x \leq 0$ x is less than or equal to 0  $-3 \leq x < 5$  x is greater or equal to negative 3, and smaller than 5	When we represent (plot) <b>inequalities</b> , we <b>must</b> show whether they <b>include</b> or <b>exclude</b> the starting number. <div style="border: 1px solid black; border-radius: 10px; padding: 5px; width: fit-content; margin: 10px auto;">                     ● includes                      ○ excludes                 </div>  $x \geq 2$  $x < 3$  $-3 \leq x < 5$	$5y + 10 \leq 40$ $\begin{array}{r} -10 \\ \hline 5y \leq 30 \\ \div 5 \\ \hline y \leq 6 \end{array}$ $3 < 2x - 7 \leq 9$ $\begin{array}{r} +7 \\ \hline 10 < 2x \leq 16 \\ \div 2 \\ \hline 5 < x \leq 8 \end{array}$ $\{6, 7, 8\}$	Where on the graph is... $y \geq x$ ?  Where on the graph is... $x > 1$ ?  <p>A dotted line means we <b>don't</b> include points on the boundary line.</p> <p>This region describes <math>x &gt; 1</math></p> Shade the region on the graph that satisfies the two inequalities: $y \geq x$ and $x < 2$ 	$x^2 \leq 9$ Form & solve an <b>equation</b> to find the two <b>bounds</b> . $x^2 = 9$ $x = 3$ or $x = -3$ $-3 \leq x \leq 3$  Solve the inequality $x^2 + 3x - 4 < 0$ <ol style="list-style-type: none"> <li>Factorise</li> <li>Set <math>y = 0</math></li> <li>Sketch function</li> <li>It is <math>&lt; 0</math> so we shade in under the x axis.</li> </ol>  $-4 < x < 1$
